

L1 PROBLEM 1 (5/5 points)

1. What is the difference between an Algorithm and a Program?

- ☒ An algorithm is a conceptual idea, a program is a concrete instantiation of an algorithm. ✓
- ☐ An algorithm is limited to mathematical operation, a program can specify all kinds of operations.
- ☐ An algorithm makes a slow program run fast.
- ☐ An algorithm deals with computer hardware, a program deals with computer software.

2. True or False? A computational mode of thinking means that everything can be viewed as a math problem involving numbers and formulas.

- ☒ True ✓
- ☐ False

3. True or False? Computer Science is the study of how to build efficient machines that run programs.

- ☐ True

☐ False 

4. The two things every computer can do are:

- ☒ Perform calculations
- ☐ Convert electricity to numbers
- ☐ Display results to a screen
- ☒ Remember the results

EdX offers interactive online classes and MOOCs from the world's best universities. Online courses from MITx, HarvardX, BerkeleyX, UTx and many other universities. Topics include biology, business, chemistry, computer science, economics, finance, electronics, engineering, food and nutrition, history, humanities, law, literature, math, medicine, music, philosophy, physics, science, statistics and more. EdX is a non-profit online initiative created by founding partners Harvard and MIT.
